Rezayat Protection Coatings Co. Ltd.

Acid Proofing COATINGS & LININGS

Metz can provide a broad range of acid resistant materials including:

- Epoxy and Epoxy Novolacs
- Vinyl Esters and Furanes
- Potassium Silicates
- Viton®
- Polyurethanes

Metz products are formulated as:

- Coatings, Linings and Membranes
- Toppings and Concretes
- Castables and Gunning materials
- Adhesives and Mortars
- Movement Joints and Caulks

Acid Proofing **ACID BRICK & TILE**

Metz offers our clients a complete acid brick and tile package.

Metz provides membrane, mortar and movement joint materials. We also offer the highest quality acid and carbon bricks or tiles as required to meet the particular service conditions.

Special shapes are available to enable lining of vessels, chimney stacks etc.

Metz can assist right from the design stage to ensure a long lasting acid resistant system is achieved at your site.

Please contact Metz for all your Acid Proofing requirements.

Industrial Flooring RESINOUS FLOORING

Resinous flooring systems are available to suit all applications and budgets. If a simple sealer is all that is required to harden the surface, minimise wear and suppress dust Metz has the right product.

Alternatively your facility may require a higher build, easy to clean, hygienic floor topping. Or perhaps you have heavy constant traffic with slippery floor contaminants or corrosive chemical spillages to contend with.

Whatever the condition Metz has a solution and as we can install every product we manufacture, we can offer a unique single point of responsibility warranty for your project.

Contact Metz for assistance with any resinous flooring works.

No other flooring can provide the durability and performance of a correctly specified and installed industrial tiled floor. Tiles provide an enormous range of factory manufactured slip resistant surfaces, in many colours, thicknesses and formats required for all industries.

Metz provides a complete industrial tile flooring system by manufacturing the specialty fixing materials and matching these materials with the appropriate tile for your site.

Metz can then install this floor system providing our clients with a unique single point of responsibility warranty.

Please contact Metz for your industrial tile flooring requirements.

ABOUT METZ

Metz has been a supplier and manufacturer of specialist building materials since it was founded in Melbourne on the 25th of June 1953. Metz today remains a proudly Australian owned company. Our Quality Accredited manufacturing facility is still located in Melbourne, with our head office in Sydney and a branch office in Brisbane. From these three offices we operate Australia-wide as well as exporting material to Asia, the Pacific and the Middle East.

A core difference between Metz and our competitors remains the ability to offer our clients a unique single point of responsibility material supply and installation service. Because Metz can install all the materials we manufacture or sell, our technical and site installation expertise is unsurpassed.

Metz areas of expertise today are

- Acid Proof Construction Materials – for chemical and industrial plants
- Industrial Flooring – for the heaviest duty food, beverage and industrial facilities
- Specialty Ceramic Tiles – for swimming pools, commercial kitchens and slip resistant tiles for all commercial applications.

Please contact one of our offices for assistance.
